Template

v0.0.1

Clemens Koza

Abstract

A template for typst packages

Contents

I INTRODUCTION

This is a template for typst packages. It provides the `template.id()` function:

```
1  #let id(x) = x
```
typ

II MODULE REFERENCE

II.a `template`

- [id()](#)

id(x: `any`) -> `any`

The identity function

Parameters:

x (`any`) – some parameter
